

All Your Wi-Fi Needs

Working from Home or Small Business

UniFi®

The Ubiquiti UniFi Dream Machine (UDM)

An all-in-one device with access point, four port switch and security gateway router. The UniFi Dream Machine includes everything you need for a small-scale wired or Wi-Fi network with all the benefits of UniFi, the revolutionary Wi-Fi system from Ubiquiti.

UniFi®

The UniFi FlexHD Access point

A small, sleek design and compact form factor that can easily be deployed indoors or outdoors. With flexible mounting options, the Flex HD can be deployed on tabletops, walls, poles, and ceilings.

UniFi®

The Ubiquiti UniFi nanoHD

Features simultaneous, dual-band, 4x4 MU-MIMO technology and convenient 802.3af PoE compatibility. The compact design delivers a cost-effective combination of value and performance. The UAP-NanoHD can also be powered by an 802.3af PoE compliant switch.

Small to Medium Business

aruba®
NETWORKS

Indoor access points

When performance and simplicity matter, Aruba APs support AI capabilities, the latest Wi-Fi 6 standards, and multiple form factors for deployment in any environment. Ruggedized models also support extreme temperature and humidity requirements.

aruba®
NETWORKS

Outdoor access points

Aruba outdoor APs provide seamless connectivity for large public venues, as well as pop-up sites and loading docks. Point-to-point wireless options provide Wi-Fi mesh backhaul and 60GHz speed to adjacent buildings.

aruba®
NETWORKS

Remote access points

Work from home or set up a temporary site with a solution that's easy to deploy and manage. Aruba access points are automatically configured, so employees just plug them into any existing Internet connection and they're ready to go.

Large Corporate Business
